### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 11 has been amended to depend from previous dependent claim in series

Claim 11 now reads -- The combination of claim **10** --.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest the combination of limitations nor the structural arrangement of these limitations as presented in applicant's claims. In particular, the prior art of record does not disclose or suggest a sliding door closure device including a housing, a pulley rotatably mounted within the housing. A first gear rotatably mounted within the housing having a plurality of radially spaced teeth. A second gear within the housing having a plurality of radially spaced teeth in meshed relation with the teeth of the first gear. First tensioning means (first spring member) engaged with the first gear, tensioning movement of the first gear. A second tensioning means (second spring member) engaged with the second gear, tensioning movement of the second gear during movement of the second gear in an opposite direction from movement of the first gear.

Art Unit: 3677

A cable having an exterior end for attachment to a door frame during use and an interior end connected to the first gear rotating the first gear during use. An air piston assembly is provided including a connecting arm, an airtight cylinder oriented parallel with a sliding door track defining a hollow interior cavity. A plunger arm connected to the connecting arm sized and shaped for movement within the hollow interior cavity of the airtight cylinder. A flexible member connected to the plunger arm slidably contacting walls of the hollow interior cavity of the airtight cylinder and an airflow control valve within a wall of the airtight cylinder.

None of the prior art references whether taken alone or used in combination thereof disclose or suggest all of the combined structural limitations or the structural arrangement of these limitations as set forth in applicant's claims.

### **CONCLUSION**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
